FOOTING EXCAVATION OBSERVATION REPORT

DATE FOOTINGS OBSERVED: 12/2/2020

PROJECT NO.: T-6165-10

PROJECT NAME: Talus 7 and 8

PROJECT LOCATION: Issaquah, WA

CONTRACTOR: Lungren Homes

REPRESENTATIVE:

DESCRIPTION COVERED BY THIS REPORT: Lot 52 Mass excavation

FOOTING EXCAVATION	FIELD CONDITIONS NOTED
Lot 52 stepped, mass excavation	The excavation exposed dense brown silty sand with gravel.
	Subgrade was observed to be competent, firm and
	unyielding.

NOTES: Soil conditions observed are consistent with those expected and are considered suitable for support of foundations designed for and allowable bearing capacity of 2500 psf.

Our representative has observed only the footing excavations listed above. The results of this observation are only valid for a period of 48 hours. If any change in the subgrade occurs, we should be promptly notified. Any loosened soils observed in foundation areas due to construction activity or rainfall should be removed prior to concrete placement.
